Company Description

We are a leading AgTech business that operates throughout selected international markets as part of a global group of Agri Technovation (AT) companies. As a fast-growing business, we are looking to expand our team with suitably qualified and experienced candidate/s looking for an opportunity to become part of our company and all it has to offer.

Science-based plant and soil health and nutrition is at the root of everything we do. Through our dynamic service offering (precision services, products and the use of our cloud-based data platform that supports informed decision making), we assist producers to increase their crop yields while reducing production costs. Our clients enjoy the benefit of one centralised access point for services, products and high-tech support. We also offer unique services to our clients, including MYSOIL CLASSIFICATION™, ITEST™ CARBOHYDRATES (first of its kind commercially available) and PICKLOGGER™, which offerings set us apart from our competitors.

A highly experienced leadership team drives the business with an acute ability to guide, inspire and lead all team members, ensuring strong focus on our mission - to create the most valuable synergy between crop performance and technology to all farmers.

We are immensely proud of what we have achieved so far and look forward to what's to come – new challenges, new solutions, more innovation

Job Description

Agri Technovation (AT) is seeking a highly motivated Agriculturist Assistant. The role requires technical support and assistance to Agriculturists with various agricultural disciplines for US, Latin America, New Zealand and Australia.

Main Responsibilities

- Providing technical recommendations based on various soil, leaf, and water analyses.
- Maintaining technical, financial, and administrative records.
- Compile sales budgets and meeting sales budget.
- Preparing and presenting technical presentations for company stakeholders.
- Writing advisory leaflets, technical notes, and articles.
- Maintain up to date with relevant knowledge and expertise on agricultural industry norms and trends.
- Conducting research and development to facilitate continuous product improvement.
- Gaining extensive knowledge relating to the use and application of the company's products within a specific geographic location and crop types.

Skills and Capabilities

- Self-motivated
- Organized
- Results driven
- Excellent interpersonal skills
- Innovative
- Excellent problem-solving abilities
- Work well under pressure
- A strong sense of responsibility
- Excellent communication skills
- Computer literate
- Bilingual (Afrikaans and English) – advantageous
- Should be willing to gain new scientific knowledge
- Passion for agriculture

Minimum Requirements

Qualifications

- BSc Degree in Soil Science/Agronomy or Horticulture/Geology/Environmental Sciences/Geography

Experience

- Experience in any crops advantageous

Other specific requirements

- Must be willing to work from 13h00 to 01h00
