### Company Description

---

We are a leading AgTech business that operates throughout selected international markets as part of a global group of Agri Technovation (AT) companies. As a fast-growing business, we are looking to expand our team with suitably qualified and experienced candidate/s looking for an opportunity to become part of our company and all it has to offer.

Science-based plant and soil health and nutrition is at the root of everything we do. Through our dynamic service offering (precision services, products and the use of our cloud-based data platform that supports informed decision making), we assist producers to increase their crop yields while reducing production costs. Our clients enjoy the benefit of one centralised access point for services, products and high-tech support. We also offer unique services to our clients, including MYSOIL CLASSIFICATION™, ITEST™ CARBOHYDRATES (first of its kind commercially available) and PICKLOGGER™, which offerings set us apart from our competitors.

A highly experienced leadership team drives the business with an acute ability to guide, inspire and lead all team members, ensuring strong focus on our mission - to create the most valuable synergy between crop performance and technology to all farmers.

We are immensely proud of what we have achieved so far and look forward to what's to come – new challenges, new solutions, more innovation.

## Job Description

---

The production supervisor role will be responsible for overseeing day-to-day production, whilst ensuring the upmost quality of all products.
